

The screenshot shows a terminal window titled "changhanlee@changhanlee-VirtualBox: ~/opensorce". The user has executed the command `./lab2-1.sh`. The script's output is as follows:

```
changhanlee@changhanlee-VirtualBox:~/opensorce$ ./lab2-1.sh
5
hello world
hello world
hello world
hello world
hello world
changhanlee@changhanlee-VirtualBox:~/opensorce$
```

A semi-transparent overlay is visible in the center of the terminal, displaying a 2x2 grid of red squares containing the numbers 1, 2, 3, and 4. Below this grid, the text "Num Lock Off" is written in red.

-read라는 문법을 사용해 사용자의 숫자를 입력받아 입력받은 숫자만큼 hellow world를 출력합니다.
